

Savoyenstraße 1, 1160 Vienna, Austria, T +43 1 25077-0, F +43 1 25077-7941

We are searching for a

## Head of Biochemistry Laboratory

We seek highly motivated applicants with a PhD in Biochemistry or related disciplines and experience in multiple methodologies (protein purification, western blots, enzyme assays, hormone analyses, GC-MS, HPLC), preferably related to animal physiology. Previous experience in managing a laboratory, overseeing technicians and training students is desirable. Duties include designing and validating methods to analyse compounds in biological samples (e.g., fatty acids, pheromones and other volatiles, extraction and purification of hormones from plasma and tissue samples, enzymatic activity, diet composition, nutritional analyses). Our research addresses basic and applied questions in ecology and behavior in a variety of vertebrate species. We will consider applicants at different career stages, and we welcome candidates interested in pursuing their own research within the research goals of the department.
